[Fig 127 these boys are twins not identical note however both have same type of deformity of the dental arch apparently due to the same cause](#)
[A very important source of information which deals with the relation of disturbances of the physical development of the head and mentality is provided by a study of the members of the teen age group who are classed as mentally backward in an examination of a cleveland school in a colored district that has been set aside largely for boys and girls who are distinctly deficient in their ability to learn it was disclosed that a very large percentage suffered from gross facial deformities when judged by these standards typical individuals in this group are shown in fig 128 one is white lower left it is clear that these boys were all physically injured in the formative period their clinical history indicates that the brain was involved in this disturbed development](#)
[Fig 128 these four boys are typical of a group of several hundred in a special school for backward children practically all showed some evidence of incomplete facial and dental arch development the range of defects is wide blacks are similarly injured as whites this is inhibited heredity](#)
[One of the problems involved in the development of the group of disturbances having physical and mental expressions is associated with the sensitiveness of the body during the period of adolescence many students of degenerative problems have emphasized various phases of this large problem burt one expression of the rate of the progressive degeneration that is taking place in the united states is the increase in delinquency and crime in young people between twelve and twenty years of age as well as in crime in general edgar hoover director of the bureau of investigation has recently published data showing comparative figures for 1936 and 1937 during which time crimes in the united states increased from 1 333 526 to 1 415 816 an increase of six per cent this increase is occurring in spite of the rapid development of social organizations for improving the environment](#)
[Preventive measures among the unsocial group who pass through the stages of predelinquency and crime have been almost entirely confined to improvement in the social surroundings of the growing youth while no doubt individuals with a low factor of safety are less likely to develop serious criminal tendencies under favorable](#)
